
NEWLETTER

Welcome!

As we begin to emerge from our long winter rest, this is a good time to begin to feel a new joy for simply being in this human experience. I look forward, with my wife Koka, to being of service to some of the most courageous human beings on the planet. We are reminded to once again give thanks to all of you for all of your support. But this was never about us! I have never made any claims about my own state of consciousness. My life is simply a reflection of a choice I made many

"It is here on this beautiful planet that you have the opportunity to reclaim your natural state."
Michael

years ago - to live my life consciously.

The art of conscious living, within a human/soul relationship can feel really messy and awkward. I know first hand how challenging this relationship can be. It demands from all of us a degree of honesty that can feel brutal at times. I know if your not true to your own self - it's so easy to get distracted.

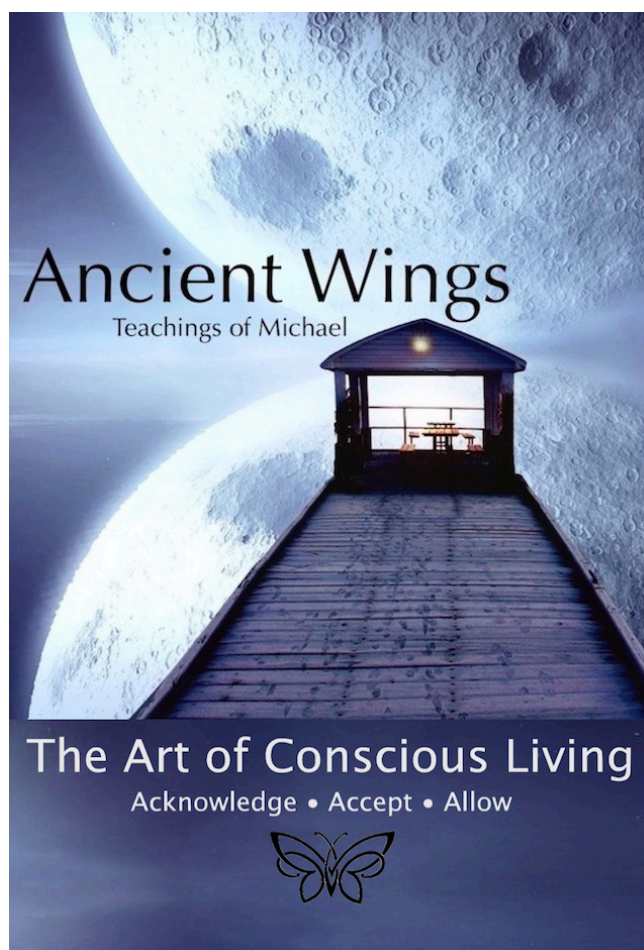

Despite all of that, my relationship with Michael has been the most fulfilling experience I've ever had. I wouldn't trade it for anything. Personally, I find the whole obsession with becoming enlightened to be one of the biggest distractions. All the labels, all the expectations that have been connected to that term. They can make it really difficult for alot of people to simply relax and allow such an experience to become real.

So as 2020 continues to unfold, Koka and I extend our hand in friendship with the true masters on this planet. The circle of light that now supports us is filled with the flame of spirit. Our passion for life survived those underlying clouds of doubt, worry and concern. Now it's time to truly celebrate and there is no one else we'd rather dance with then all of you! Such an honor!

"How would it feel if your life was incredibly fulfilling right now. Do you dare feel it?"

-MICHAEL

All our blessings!
Robert and Koka

"The enegetic ripples from your own realization are now being felt within all rhelms." Michael

I love promoting any service or product we use that enhances the quality of our own work. Over the last three months, we've been exploring a variety of different platforms to use for our live streams, but we kept coming back to Vimeo. Their business model is based on creators subscribing to their service instead of using advertising to support their brand. They would rather see YouTube and Facebook as partners than as competitors. It's just such a refreshing approach to doing business. Two years ago, Vimeo purchased Live Stream - considered by many to be one of the best streaming services on the planet. Over the next year, we will be moving hundreds of hours of video content over to Vimeo.

Monthly subscribers to the Masters Unplugged program will be the first to enjoy using the new Vimeo playlist in all of our video libraries. During our research of Vimeo, we also discovered an opportunity to use their own Vimeo app. That of course sparked a light inside my own head. I rarely use my own smartphone so I was a little surprised to see the role that apps play in so many people's lives. So what does a creator do - you create your own app!!

Ancient Wings App

Free Download • Home Page
Web Version - Mac /Android

Ancient Wings App

We decided to use the same format as Twitter - called a PWB or a progressive web-based app. This can be downloaded for free on any android or iOS device from our home page. For those that prefer the native app, that too can be downloaded for Android devices only from the Google Play store. Enjoy!!

Simona Elena Duta left this planet this week. Her passion for life was an inspiration for us all.

Thank you my friend, it was an honor!!
All my love!
Robert Theiss
